## SKILLS

Python, Ruby, Javascript, TypeScript, React, Django, Ruby on Rails, GraphQL, Redux, Java, AWS, React Native, jQuery, HTML, CSS, SQL, Git, TDD, Docker, Fluent in Spanish

## EXPERIENCE

### Software Development Engineer

July 2020 - Present

*Amazon, Inc.*

- Designed system which would run daily to manage user permissions for ~60 million users leveraging AWS tools such as S3, Lambda, DynamoDB, SQS, SNS.
- Played an instrumental role in the development of microservice-based customer-facing application with ~200,000 monthly active users (MAU).

### Software Engineer

May 2019 - July 2020

*LoanStreet, Inc.*

- Reduced average response time for users with 1,000 entries from 7850ms to 350ms.
- Developed stateful application to produce historical reports of user loans, payments, and participations in 35s; with the legacy system taking 15min to produce the same report.
- Designed and engineered audit trail feature for production application in order to create a detailed report of data changes.

### Full-Stack Developer

2017 - 2019

*Express Transport by Air, LLC.*

- Pioneered and implemented a warehouse product tracking system to increase personnel productivity by 50%.
- Engineered innovative internal tools using PHP, JavaScript, jQuery and SQL to maximize efficiency and reduce clerical errors by 15%.
- Designed and developed a stylish and fully responsive website for the company.

## PROJECTS

### Fakebook (Rails, React, Redux, GraphQL, PostgreSQL, AWS S3, Heroku) | Sole Developer

[live](#) | [github](#)

*A single-page web application inspired by Facebook where users can share media with family and friends from all over the world*

- Introduced improvements in time complexity and server loading speed by designing custom SQL queries to extract required data in a single query through the use of Active Record associations.
- Engineered a custom process for multiple media file uploading which mimicked Facebook's media uploading process precisely.
- Reduced the number of required database tables by 16% and refactored backend code by utilizing polymorphic tables.

### Keypress (JavaScript, Webpack, HTML5, CSS3) | Sole Developer

[live](#) | [github](#)

*Fully interactive javascript application where users can complete typing lessons to improve their accuracy and speed.*

- Eradicated graphic rendering lag and enhanced user experience (UX) by building a custom image caching algorithm which caches lesson images on a per-need basis.
- Implemented a seamless multi-page experience through custom, highly maintainable, JavaScript rendering functions and OOP.

## EDUCATION

Thomas Edison State University - B.S. Electronics Systems Engineering

2017 - 2019

Union County College - A.S. General Engineering

2011 - 2014
